Problems to Solve

On/Off-Ramp Conversion Costs

Difficulty managing fiat-crypto conversion with transparent fees and competitive exchange rates.

Slow Crypto Payouts & Payrolls

Complicated and time-consuming processes for sending crypto payments to stakeholders.

Weak Fund Custody Control

Limited access to reliable custody options ensuring fund safety, compliance, and easy control.

Compliance Adaptation Barriers

Struggles with ever-changing global and local regulations around KYC, AML, and transaction reporting.

Liquidity & Settlement Delays

Slow or costly transactions between crypto and fiat systems, impacting cash flow and user trust.

Complex System Integration

Existing tools often lack seamless integration with business systems, wallets, or payment gateways.

Solutions: Connect & Go

Seamless Integration

Plug in and start operating – no lengthy setup or infrastructure overhaul needed.

Own Solutions

GoFinans a ready-to-use financial gateway for managing fiat and crypto flows, with built-in fee control, reporting, and multi-currency support.

Direct Integrations

Connect directly with CEXs, KYC/AML providers, and banking APIs to streamline compliance and liquidity management.

Region-Specific Flexibility

Adaptable architecture to integrate jurisdictional legal modules and regionally approved service providers.

Modular Design

Choose the services you need – from fiat ramps to custody, payouts, or compliance automation.

Solutions: Whitelabel

✓ Fully-branded, crypto-powered platform experience

Your logo, your domain, your identity.

✓ Modular architecture

Choose from custody/hybrid wallets, investment & portfolio platforms, on/off-ramp flows, enterprise vaults.

✓ Seamless setup process

Create an account, provide KYB, get personal subdomain, sandbox, APIs/SDKs, then go live.

✓ End-to-end integration

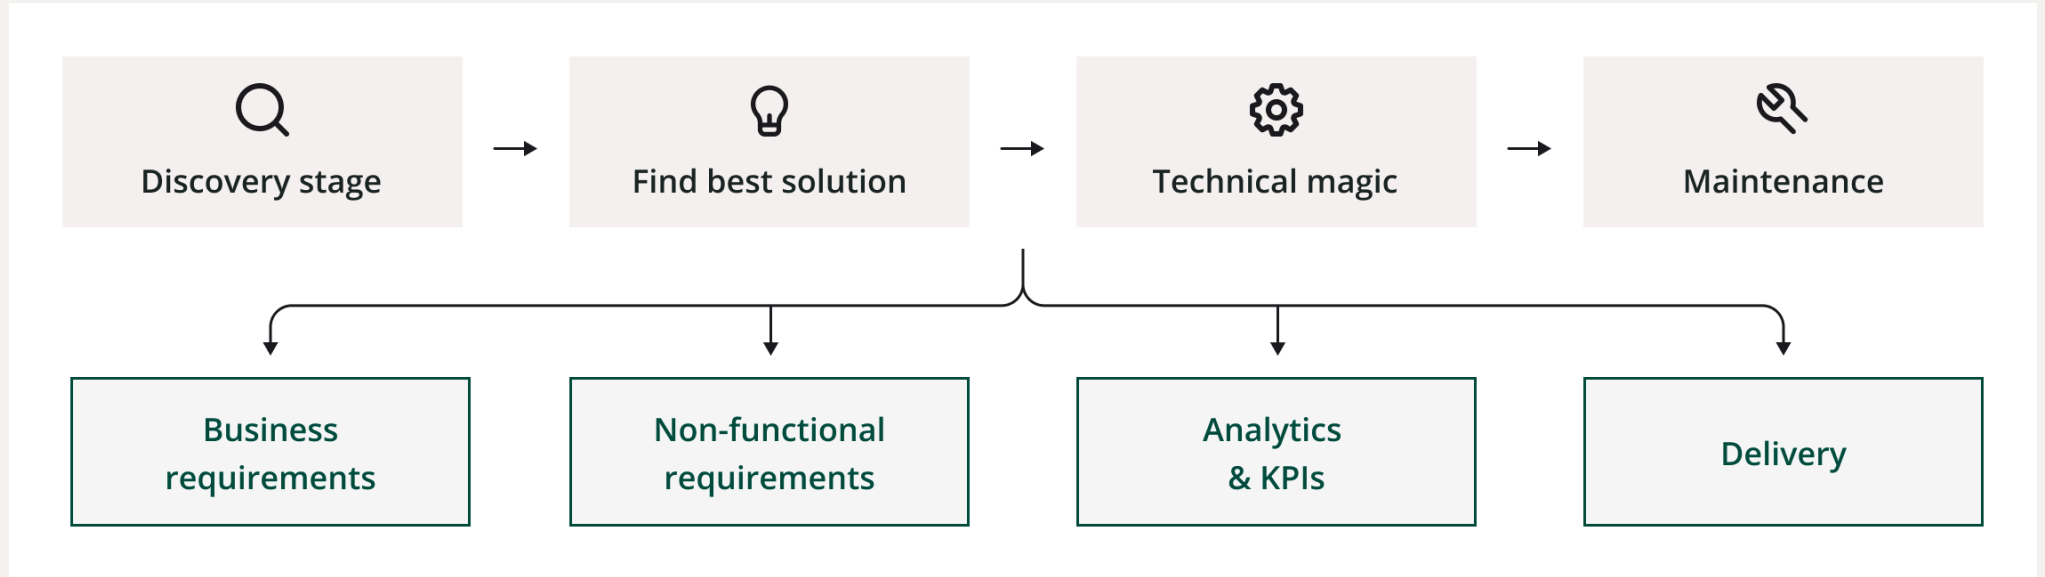

From branded crypto wallets and corporate on/off-ramps to portfolio dashboard, admin/partner portals and enterprise exchange functions.

✓ Compliance and scalability built-in

Regulatory-ready infrastructure with multi-currency support, real-time rates, global payment methods.

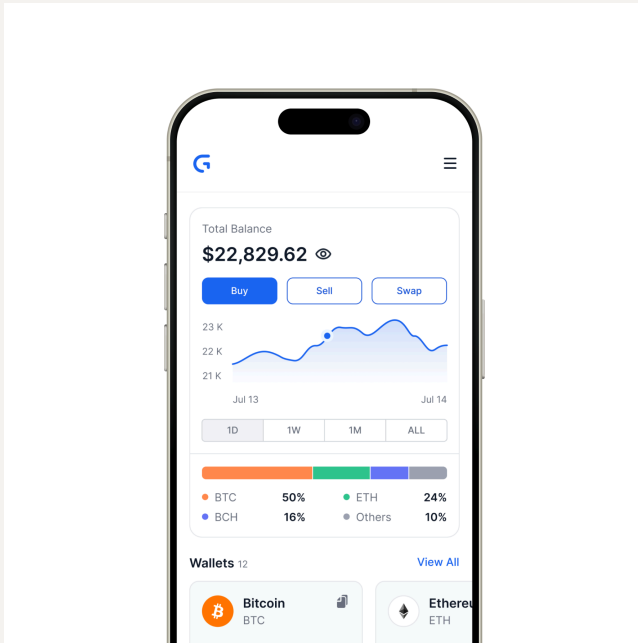

Workflow

Details:

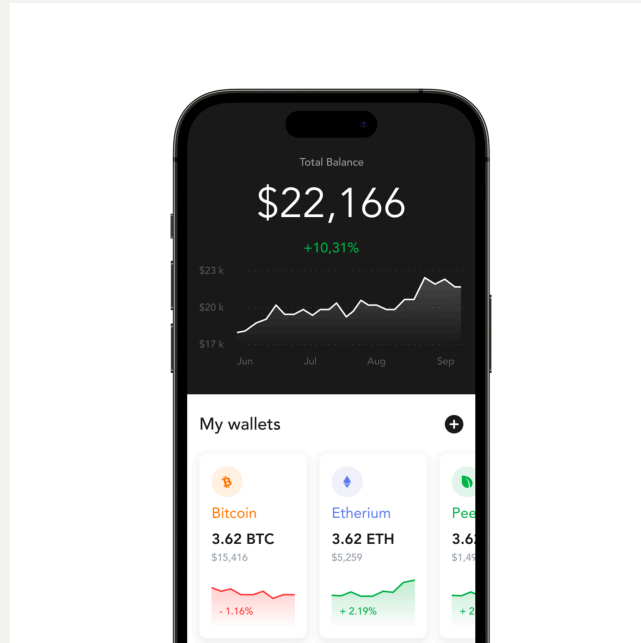

- Conduct interviews and discovery sessions to understand client needs and challenges;
- Define the optimal approach: ready-made, white-label, or custom hybrid solution;
- Implement and integrate core components such as KYC, security protocols, and AI-driven functionalities;
- Provide ongoing support and maintenance to ensure stability, compliance, and growth.
